

STABILIFE[®] HIGH PERFORMANCE ENDOSCOPE LIGHT SOURCE HEAT MIRRORS

Optimized for the unique requirements of Endoscope Illumination Systems, these filters provide the following features:

- o High durability Stabilife[®] dielectric coatings deposited upon temperature resistant, optical grade, image-quality borosilicate glass
- o Fully environmentally stable
- o Field-proven extended longevity
- o Optimized high visible transmission and reliable, efficient heat rejection
- o Efficient UV rejection
- o Virtually Colorless
- o Offered in basically any size and shape
- o Maximized resistance to thermal shock
- o High chemical resistance
- o Many standard thicknesses available from 1.1mm to 5mm thick
- o Customized spectral performance available

Typical Nominal Performance
